SCHEDULE 4 TO CLAUSE 42.01 ENVIRONMENTAL SIGNIFICANCE OVERLAY

Shown on the planning scheme map as ESO4 .

PAKENHAM NORTH RIDGE

1.0
10/06/2021
C254card

Statement of environmental significance

The Pakenham ridge has regional significance for biodiversity. It makes a substantial contribution to biodiversity in the Gippsland Plain Bioregion as well as the Pakenham area. The area has remnants of Grassy Forest, an ecosystem that is vulnerable in the area. The Cobra Greenhood Orchid (*Pterostylis grandiflora*) which is of state significance, and the Green Scentbark (*Eucalyptus fulgens*) which is of state/national significance, are found in the area. The area is characterised by a geology of Devonian Granitic and Silurian Sediment origin, moderate to steep slopes, and areas of remnant vegetation. These characteristics contribute to environmental values including landscape quality, water quality, and habitat of botanical and zoological significance. These characteristics are also a significant factor contributing to environmental hazards such as erosion, salinity and fire risk, and susceptibility to visual intrusion from buildings and works.

2.0

C254card

Environmental objective to be achieved

To protect and enhance the significant environmental and landscape values of the Pakenham North ridge.

To ensure that the siting and design of buildings and works does not adversely impact on environmental and landscape values including the ridge landform, the diverse and interesting landscape, the natural skyline of ridge areas, areas of remnant vegetation, and habitat of botanical and zoological significance.

To ensure that the siting and design of buildings and works responds to environmental and landscape values, and addresses environmental hazards of erosion, salinity and fire.

To maintain, manage and promote replanting of native vegetation as an important element of the Pakenham North ridge landscape and natural systems.

To ensure long term protection of areas of high conservation value and promote the protection and enhancement of wildlife habitat and corridors.

Permit requirement

A permit is required to construct a fence.

A permit is not required to remove, destroy or lop any vegetation if:

- The vegetation is a tree overhanging the roof of a building used for Accommodation. This exemption only allows the removal, destruction or lopping of that part of the tree which is overhanging the building and which is necessary for fire protection.
- The vegetation is dead as a result of natural circumstances or as a result of the spread of noxious weeds and which has been assessed as being suitable for removal by an authorised officer of the responsible authority. This exemption does not apply to standing dead trees with a trunk diameter of 40 centimetres or more at a height of 1.3 metres above ground level.
- It is the minimum extent necessary to maintain utility services for the transmission of water, sewage, gas, electricity, electronic communications or the like, provided that the removal, destruction or lopping is with the written consent of the responsible authority.
- It is necessary for maintenance by the Cardinia Shire Council of works including any road, drain, essential service or public facility.
- It is the removal of any vegetation from an existing dam wall where the vegetation may impact on the structural stability of the dam wall.
- The vegetation is required to be pruned or lopped (but not removed or destroyed) as part of normal domestic or horticultural practice for the species.

C254card**Application requirements**

The following application requirements apply to an application for a permit under 42.01, in addition to those specified elsewhere in the scheme and must accompany an application, as appropriate, to the satisfaction of the responsible authority:

Buildings and works:

- The location of any existing buildings and works.
- Details of elevations, including external colours, materials and finishes.
- The location of any existing vegetation and any vegetation proposed to be removed.
- Details of the location and extent of any earthworks.

To remove, destroy or lop native vegetation:

- A photograph or site plan (drawn to scale) showing the boundaries of the site, existing vegetation and the vegetation to be removed.
- A description of the vegetation including understory to be removed, including the species, extent, number and size (diameter at 1.3 metres above natural ground level) of any trees to be removed and the Ecological Vegetation Class of native vegetation.
- Location of any hollow bearing trees.
- Topographic information, highlighting ridges, crests and hilltops, streams and waterways, slopes of more than 20 percent, drainage lines, low lying areas, saline discharge areas, and areas of existing erosion.
- A written explanation of the steps that have been taken to:
 - Avoid the removal of vegetation, where possible.
 - Minimise the removal of vegetation.
 - Appropriately replace and/or compensate the loss of vegetation, if required.
- A copy of any property vegetation plan that applies to the site.
- Where the removal, destruction or lopping of vegetation is to create defensible space, a statement explaining why removal, destruction or lopping of vegetation is required having regard to other available bushfire risk mitigation measures. This does not apply to the creation of defensible space in conjunction with an application under the Bushfire Management Overlay.

C254card**Decision guidelines**

The following decision guidelines apply to an application for a permit under Clause 42.01, in addition to those specified in Clause 42.01 and elsewhere in the scheme which must be considered, as appropriate, by the responsible authority:

General

- The Land Capability Study for the Cardinia Shire (February 1997).
- The need for an environmental and landscape impact assessment report, prepared by a properly qualified person and to the satisfaction of the responsible authority, that includes:
 - An appropriate consideration of alternative subdivision layouts and alternative sites for buildings

- Possible design responses and design guidelines
- Consideration of appropriate environmental management practices, including replanting of native vegetation and ongoing protection and management of vegetation and habitat areas.
- The protection and enhancement of environmental significance having regard to:
 - Protecting habitat areas, landscape areas and vantage points of high quality
 - Protecting and enhancing areas of native vegetation
 - Setting development back from the ridgeline to allow appreciation of the ridge landform and topography, and to maintain the natural skyline of the ridge
 - The visual prominence of land above the 60-metre contour as a defining landscape feature
 - The integration of buildings and works with environmental and landscape features
 - Appropriate environmental management practices.
- Measures to address environmental hazards or constraints including erosion, drainage and fire.

Buildings and works

This copied document is made available for the purpose of the planning process as set out in the Planning and Environment Act 1987. The information must not be used for any other purpose. By taking a copy of this document you acknowledge and agree that you will only use the document for the purpose specified above and that any dissemination, distribution or copying of this document is strictly prohibited.

- The impact of any buildings and works on areas of remnant vegetation, and habitat of botanical and zoological significance.
- The impact of proposed buildings and works on the landscape character of the area, including prominent ridgelines and significant views.
- The control of the density of buildings and subdivision necessary to meet environmental objectives.
- The establishment of appropriate building envelopes and the benefits of requiring building envelopes to be shown on plans of subdivision.
- Whether the siting, height, scale, materials, colours and form of proposed buildings and works, including roads and infrastructure service lines, have been designed to have least visual effect on the ridge environment and landscape.
- Whether approval of any proposed buildings and works is compatible with maintaining the visual, natural and cultural significance of the ridge landscape.
- The benefit of permit conditions requiring all building materials to be non-reflective and of colours that are complementary to those of the natural landscape.
- The benefit of conditions requiring the landscaping of buildings and works, while also having regard to the maintenance of existing viewlines.

Vegetation and habitat

- The retention of remnant vegetation and wildlife habitat, and the need to plant vegetation along waterways, gullies, ridgelines and property boundaries.
- The conservation and enhancement of the area's native vegetation and habitat values, including allowing for natural regeneration of native vegetation
- Providing linked open space and local habitat corridors.
- Maintaining vegetation as a key element of the landscape, and maintaining and enhancing the continuity of vegetation.
- The significance of any vegetation proposed to be removed, including its rarity and habitat value.
- The need to revegetate or landscape the site with native species and dispersing buildings to allow trees to be planted between them.

Response to slope

- The availability of other alternative sites, alternative building designs or alternative construction practices for proposed buildings and works that minimise cut and fill and would better meet the environmental objectives of this schedule, having regard to the size and topography of the land, retention of vegetation, and the form and nature of the proposed buildings and works.
- The availability of reasonable alternative routes, alternative designs or alternative forms of installation for roads, access driveways and infrastructure service lines that would avoid impact on vegetation and habitat areas, follow the contours of the land, minimise cut and fill and better meet the environmental objectives of this schedule.
- Locating buildings and works in low lying positions on a site.
- Slope stability and the need for a geotechnical report, particularly where slopes are greater than 20 percent.

This copied document is made available for the purpose of the planning process as set out in the Planning and Environment Act 1987. The information must not be used for any other purpose. By taking a copy of this document you acknowledge and agree that you will only use the document for the purpose specified above and that any dissemination, distribution or copying of this document is strictly prohibited.

Waterways

- The protection of waterways and water quality through the appropriate management of stormwater, effluent disposal, erosion, sediment pollution and the provision and protection of vegetation especially along watercourses.

Salinity

- Whether vegetation retention and revegetation is occurring and whether appropriate management techniques are being put in place to address water table and salinity issues.

Dear Sir/Madam,

**RE: Lot 131 Pakenham Road, Pakenham
THE RISE DESIGN ASSESSMENT PANEL APPROVAL**

Thank you for submitting your development plans to The Rise Design Assessment Panel for consideration. A review of your development plans indicates they are compliant with The Rise Design Guidelines and generally in line with restrictions on your plan of subdivision for the Estate. Any changes to material or design of the dwelling require the submission of amended plans for approval. You can only construct from the most recently approved plans.

It should be noted this approval relates only to the matters required under the terms of the Covenant which is concerned essentially with the appearance and siting of buildings. No detailed examination has been made of the construction specifications and no consideration has been made regarding whether the proposal complies with the requirements of the Standard Building By-laws nor any other statute.

You are reminded that approval from the Design Assessment Panel does not constitute or imply building approval and separate application is to be made to a private building surveyor prior to the commencement of development.

Please find attached an endorsed copy of your plans for your records. **Please refer to any other conditions marked-up on the plans and ensure they are suitably addressed.**

Please note;

- All lots require a planning permit under the ESO placed on the overall Estate. An application must be approved by council before construction commences. The Building envelopes are to be used as a guide only, the planning permit will override all siting recommendations by the DAP team.
- Mandated endorsed building envelopes are applicable for lots 313-318, 527-533, 628-634.
- Any lot under 300m² in size, requires a planning permit for being under 300m² in addition to the ESO planning permit. Front setbacks less than 4m are subject to further council [REDACTED]
- [REDACTED] for information, please contact [REDACTED]
- There are no connections to Recycled Water (purple taps) in the estate therefore, other water saving requirements are to be met as per the current building regulations.
- Due to planning permit requirements, Gas appliances may not be able to be installed, further Council clarification is required.

Should you have any queries, please contact the undersigned on 9524 8888 or via email planlodgement@bevwill.com.au All new submissions, re-submissions, amendment submissions or supplemental submissions, please use www.portal.beveridgewilliams.com.au
